C001 · Notice a cue, answer, and pause

Young infants · Birth–5 months | Relationships & regulation | Responsive interaction

Purpose

Build trust through a predictable response to an infant’s communication.

Prepare and invite

Attentive familiar caregiver; quiet comfortable space
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Observe a small movement, sound, facial change or turning away.
2. Respond with a gentle voice or appropriate care, then pause.
3. Notice the next cue and adjust rather than continuing automatically.

Observe and respond

What cue occurred, the adult response and whether the infant settled, engaged or needed something else.

Possible next opportunity

Repeat the response pattern during a familiar routine.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Follow the infant’s individual care plan and safe positioning. Never withhold feeding, comfort or needed care to create a learning trial.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C002 · A familiar calming sequence

Young infants · Birth–5 months | Relationships & regulation | Responsive interaction

Purpose

Support co-regulation through a familiar, responsive care sequence.

Prepare and invite

Caregiver voice; usual approved comfort routine
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Approach calmly and tell the infant what you are doing.
2. Offer a familiar comfort action that fits the cue.
3. Pause and adjust; seek care-plan guidance if the infant remains distressed.

Observe and respond

Comfort cues and which adult action appeared helpful.

Possible next opportunity

Share the observed comfort preference with the family.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not shake, restrain, swaddle for an activity or use weighted items. An activity does not explain persistent or unusual distress; follow health procedures.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C003 · Face-to-face conversation

Young infants · Birth–5 months | Communication & early literacy | Responsive interaction

Purpose

Experience a back-and-forth exchange without requiring speech or eye contact.

Prepare and invite

Caregiver at a comfortable distance and position
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Wait until the infant is awake and available.
2. Offer a short gentle sound or phrase and pause.
3. Respond to a movement, gaze shift, vocalization or other cue.

Observe and respond

The infant’s response form and the timing of the adult’s pause.

Possible next opportunity

Repeat a familiar phrase in the home language.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Never require eye contact or continue when the infant turns away.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C004 · A family lullaby during care

Young infants · Birth–5 months | Communication & early literacy | Responsive interaction

Purpose

Connect a familiar voice pattern with warm interaction.

Prepare and invite

Family-approved song or spoken phrase
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Ask the family for a comfortable short song or phrase.
2. Use it softly during an appropriate awake care moment.
3. Pause and notice changes in movement, expression or vocalization.

Observe and respond

Comfort, attention and any signs that sound should stop.

Possible next opportunity

Invite another familiar caregiver to use the same phrase.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Keep volume low; this is responsive interaction, not a sleep-training program or a required way to fall asleep.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C005 · Comfortable awake tummy-time invitation

Young infants · Birth–5 months | Movement & self-care | Responsive interaction

Purpose

Offer an accessible opportunity for active movement while awake.

Prepare and invite

Firm clear floor mat; caregiver within reach
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose a brief comfortable awake moment and follow the care plan.
2. Offer a supervised tummy-time position suited to the infant.
3. Stay close, respond to cues and end or reposition when needed.

Observe and respond

Comfort, active movement and support actually provided.

Possible next opportunity

Offer another brief opportunity when the infant is available.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Awake and directly supervised only. Never put an infant prone to sleep. Use a firm flat clear approved sleep surface on the back for every sleep; follow current program health guidance.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C006 · Reach toward a familiar hand

Young infants · Birth–5 months | Movement & self-care | Responsive interaction

Purpose

Explore voluntary reaching and midline movement.

Prepare and invite

Adult’s clean hand or a large safe infant object held by an adult
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Position the infant safely with comfortable access.
2. Offer a hand or object where it can be noticed without strain.
3. Wait for any voluntary movement and adjust the distance.

Observe and respond

Movement chosen by the infant, comfort and the amount of support.

Possible next opportunity

Offer from a slightly different comfortable position.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not pull an infant by the arms, force grasping or use an object that can detach, choke or cover the face.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C007 · Following a slow nearby movement

Young infants · Birth–5 months | Thinking & mathematics | Responsive interaction

Purpose

Notice a change and choose how to attend.

Prepare and invite

Adult face or large simple high-contrast card
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer the face or card in comfortable light.
2. Move slowly over a small comfortable range.
3. Pause and follow the infant’s cue about whether to continue.

Observe and respond

Attention shifts, comfortable tracking and turning away.

Possible next opportunity

Repeat with a familiar object after a rest.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No bright lights, flashing devices, laser pointers or objects suspended above a sleep space.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C008 · My response changes the exchange

Young infants · Birth–5 months | Thinking & mathematics | Responsive interaction

Purpose

Experience a simple social cause-and-effect pattern.

Prepare and invite

Responsive caregiver; familiar short sound
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Notice a voluntary sound or movement.
2. Answer with a brief consistent sound or expression.
3. Wait to see whether the infant continues or changes the exchange.

Observe and respond

The sequence of infant action, adult response and next infant cue.

Possible next opportunity

Repeat the pattern in a different comfortable care moment.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C009 · Noticing daylight and shade

Young infants · Birth–5 months | Science & inquiry | Responsive interaction

Purpose

Experience a gentle difference in the visual environment.

Prepare and invite

Comfortable indoor position near indirect daylight
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Notice indirect light on a nearby wall or surface.
2. Describe the change softly without moving the infant into glare.
3. Pause and follow attention or disengagement cues.

Observe and respond

What appeared to draw attention and whether lighting was comfortable.

Possible next opportunity

Revisit the familiar space at another time.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Avoid direct sun, hot windows, bright reflections and exposure that conflicts with sun/temperature guidance.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C010 · One safe texture at a time

Young infants · Birth–5 months | Science & inquiry | Responsive interaction

Purpose

Explore a comfortable sensory difference with adult support.

Prepare and invite

Clean soft cloth approved for awake interaction; adult hands
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer the cloth near a hand without covering the face.
2. Allow a voluntary touch or movement and name the sensation simply.
3. Remove it when interest ends and compare another time.

Observe and respond

Acceptance, withdrawal and the sensory access chosen.

Possible next opportunity

Offer the same texture again rather than adding many new ones.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult holds the cloth during the interaction and removes it afterward. No loose cloth in a sleep space; no forced touch.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C011 · A gentle rhythmic exchange

Young infants · Birth–5 months | Creative expression | Responsive interaction

Purpose

Experience a simple rhythm through warm responsive interaction.

Prepare and invite

Caregiver voice or quiet hand tapping on own knee
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer a short soft rhythm.
2. Pause for any movement or sound.
3. Echo the infant’s response or stop when the cue changes.

Observe and respond

Responses to rhythm and the need for a quieter or shorter experience.

Possible next opportunity

Return to a familiar rhythm during a later awake moment.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not bounce or move an infant to force a rhythm; keep sound comfortable.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C012 · Sharing a high-contrast page

Young infants · Birth–5 months | Creative expression | Responsive interaction

Purpose

Share visual interest and early meaning-making with a caregiver.

Prepare and invite

Large sturdy infant-safe book held by an adult
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Hold one simple page at a comfortable angle.
2. Name or describe what appears to interest the infant.
3. Allow looking away, touching with support or ending.

Observe and respond

The infant’s preferred way of participating.

Possible next opportunity

Revisit the same page with a familiar phrase.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult controls the book; prevent loose pieces, sharp corners or a book falling onto the infant.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C013 · A familiar welcome

Young infants · Birth–5 months | Community & belonging | Responsive interaction

Purpose

Create a predictable connection during arrival.

Prepare and invite

Child’s preferred name; family-approved greeting
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Receive family information and essential care needs.
2. Greet the infant with a familiar phrase and responsive touch only as appropriate.
3. Allow a calm transition with the known caregiver.

Observe and respond

Transition cues, family information and support that helped.

Possible next opportunity

Use the same agreed greeting on another day.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Follow authorized handoff and individual care procedures; learning notes do not replace required arrival or health records.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C014 · Family voices and photographs

Young infants · Birth–5 months | Community & belonging | Responsive interaction

Purpose

Connect classroom care with familiar people and home language.

Prepare and invite

Family-consented photograph or familiar spoken message, adult-held
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite a family-selected photo or phrase without requiring one.
2. Share it briefly during a comfortable awake interaction.
3. Respond to the infant’s cue and tell the family what you noticed.

Observe and respond

Attention or comfort connected with the shared material.

Possible next opportunity

Use the family’s chosen words in an everyday routine.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Keep photos private; no social-media sharing or cords/frames within reach. Family participation is optional.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C015 · Explore and return to a safe base

Older infants · 6–11 months | Relationships & regulation | Responsive interaction

Purpose

Support exploration while keeping connection available.

Prepare and invite

Clear safe floor space; familiar nearby adult
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Sit where the infant can access you and the safe play space.
2. Follow the infant’s movement or attention without directing every action.
3. Respond promptly when the infant checks back or needs comfort.

Observe and respond

How the child explores, reconnects and uses adult support.

Possible next opportunity

Keep a familiar safe space available for repetition.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adapt for the infant’s actual mobility; no walkers, forced standing or unsafe climbing.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C016 · Predictable care with a small pause

Older infants · 6–11 months | Relationships & regulation | Responsive interaction

Purpose

Make care a cooperative interaction with a readable sequence.

Prepare and invite

Usual care materials; familiar caregiver
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Tell the child the next care action in familiar words.
2. Pause for a movement or communication response.
3. Continue needed care gently, describing and adapting to the child.

Observe and respond

The child’s cues and how the adult acknowledged them.

Possible next opportunity

Use a consistent phrase for one familiar care action.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not delay hygiene or needed care. Follow the individual plan and approved care procedures.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C017 · Name what the child notices

Older infants · 6–11 months | Communication & early literacy | Responsive interaction

Purpose

Connect a word or sign with shared attention.

Prepare and invite

One large familiar safe object; caregiver
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Follow the child’s interest in an object.
2. Name it in a home language or agreed classroom language.
3. Pause and respond to looking, reaching, gesture or sound.

Observe and respond

Interest and communication in any form, not just word imitation.

Possible next opportunity

Use the same word during real use of that object.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C018 · A book the child can help explore

Older infants · 6–11 months | Communication & early literacy | Responsive interaction

Purpose

Participate actively in a shared book experience.

Prepare and invite

Sturdy infant-safe book; adult support
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer a book and wait for an interest cue.
2. Support touching or turning a page without taking over.
3. Describe one noticed picture and allow repetition.

Observe and respond

How the child chooses, touches, looks or communicates about a page.

Possible next opportunity

Revisit a favorite page with the same family-language words.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Check book integrity; no detachable or swallowable features.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C019 · Travel toward a chosen object

Older infants · 6–11 months | Movement & self-care | Responsive interaction

Purpose

Support the child’s own way of moving toward an interest.

Prepare and invite

Safe open floor space; large infant-safe object
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Place a safe object within an achievable comfortable range.
2. Allow rolling, reaching, crawling or another self-chosen movement.
3. Adjust support and celebrate the effort without insisting on a posture.

Observe and respond

Movement strategy, access and whether distance needs changing.

Possible next opportunity

Offer the same challenge in a familiar safe place.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not use food as a lure, force crawling or position the infant beyond their safe movement abilities.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C020 · In and out with large objects

Older infants · 6–11 months | Movement & self-care | Responsive interaction

Purpose

Coordinate grasp, release and purposeful movement.

Prepare and invite

Wide low stable container; large approved infant objects
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Show one object going into the container.
2. Offer another and wait for the child’s choice.
3. Follow filling, removing or exploring rather than requiring a full sequence.

Observe and respond

Grasp, release, preferred action and support needed.

Possible next opportunity

Offer a different safe container opening.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Only objects too large to swallow; no bags, tight lids, cords or containers that can trap fingers or cover the head.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C021 · A partly hidden familiar object

Older infants · 6–11 months | Thinking & mathematics | Responsive interaction

Purpose

Explore whether a familiar object remains when partly hidden.

Prepare and invite

Large safe object; small cloth controlled by adult
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Let the child see the object.
2. Cover only part and wait for a response.
3. Reveal together and repeat only if the child wants.

Observe and respond

Looking, reaching, removing the cover or choosing another action.

Possible next opportunity

Vary how much is visible without creating frustration.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult holds and removes the cloth; never cover the child’s face or leave cloth in a sleep area.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C022 · A sound follows an action

Older infants · 6–11 months | Thinking & mathematics | Responsive interaction

Purpose

Explore a simple action and its result.

Prepare and invite

One large sealed infant-safe sound toy
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer the inspected toy during awake play.
2. Wait for a movement that produces sound.
3. Name the result and allow the child to repeat or stop.

Observe and respond

Action-result noticing and attempts to repeat.

Possible next opportunity

Offer a quieter or easier-to-activate version.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No loose batteries, magnets or small parts. Keep sound away from ears and at a comfortable level.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C023 · Compare two safe surfaces

Older infants · 6–11 months | Science & inquiry | Responsive interaction

Purpose

Notice a sensory difference through voluntary exploration.

Prepare and invite

Two large fixed surfaces with comfortable textures
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer one surface with an easy route to withdraw.
2. Wait for touching, looking or another response.
3. Offer the second at another moment and describe without asking for a correct answer.

Observe and respond

Sensory preference, exploration and withdrawal.

Possible next opportunity

Repeat the preferred surface during safe floor play.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Respect sensory boundaries; avoid rough, sharp, allergenic or detachable materials.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C024 · Watch a large ball travel

Older infants · 6–11 months | Science & inquiry | Responsive interaction

Purpose

Observe movement and what makes an object stop.

Prepare and invite

Large soft ball; clear floor; adult
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Roll the ball slowly across a clear short path.
2. Allow the child to follow it in their own way.
3. Pause at its stopping point and invite another comfortable exchange.

Observe and respond

Attention to movement, anticipation and chosen response.

Possible next opportunity

Try rolling to a willing nearby adult.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Use a ball too large to swallow and keep children clear of traffic or steps.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C025 · Echo the child’s sounds

Older infants · 6–11 months | Creative expression | Responsive interaction

Purpose

Express an idea and hear it acknowledged.

Prepare and invite

Familiar caregiver; quiet space
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Listen for a comfortable sound or vocal pattern.
2. Echo it softly without correcting or demanding repetition.
3. Pause and answer the next response.

Observe and respond

Initiation, changes in the exchange and comfort.

Possible next opportunity

Try the exchange with a familiar home-language song.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C026 · Move to a familiar song

Older infants · 6–11 months | Creative expression | Responsive interaction

Purpose

Explore self-chosen movement in response to music.

Prepare and invite

Safe supported position; caregiver singing
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer a short familiar song at low volume.
2. Allow any comfortable movement or still observation.
3. Pause and watch for the child’s wish to continue.

Observe and respond

Movement choices, rhythm response and engagement.

Possible next opportunity

Repeat a favorite song rather than introducing many at once.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No forced standing, swinging, shaking or movement beyond the infant’s safe range.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C027 · Choose between two familiar things

Older infants · 6–11 months | Community & belonging | Responsive interaction

Purpose

Communicate a preference that another person respects.

Prepare and invite

Two large safe familiar objects
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Show two accessible choices without crowding the child.
2. Notice a reach, look, gesture or other clear preference.
3. Honor the choice and name it.

Observe and respond

How the child communicates and whether the options are accessible.

Possible next opportunity

Use a choice during a familiar nonessential play routine.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Choices never replace required care, safe supervision or the adult’s responsibility for safe materials.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C028 · Our familiar people book

Older infants · 6–11 months | Community & belonging | Responsive interaction

Purpose

Connect familiar people, names and warm conversation.

Prepare and invite

Private family-consented photo book with sturdy pages
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Share a family-selected page briefly.
2. Use the names and relationships the family prefers.
3. Respond to the child’s interest and stop when needed.

Observe and respond

Recognition cues and participation without requiring naming.

Possible next opportunity

Invite the family to update a photo or preferred word.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Use inclusive family descriptions and protect privacy. No child must provide personal photos.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C029 · A supported arrival ritual

Young toddlers · 12–23 months | Relationships & regulation | Child-led exploration

Purpose

Build predictability during separation and reunion.

Prepare and invite

Family-agreed greeting; familiar accessible play choice
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Receive the family’s information and acknowledge the child’s feelings.
2. Offer a familiar caregiver connection and one known play option.
3. Stay responsive and document what helped rather than timing a required calm-down.

Observe and respond

Cues, adult support and what helped the transition.

Possible next opportunity

Repeat the helpful parts and coordinate with the family.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C030 · Name a feeling and offer help

Young toddlers · 12–23 months | Relationships & regulation | Child-led exploration

Purpose

Connect an emotional experience with supportive language.

Prepare and invite

Real everyday situation; optional simple picture
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Notice what happened without labeling the child.
2. Offer a short feeling word or sign and practical comfort.
3. Wait for a response and help with the immediate need.

Observe and respond

The event, the child’s cue and adult co-regulation.

Possible next opportunity

Use the same calm phrase in another real situation.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not demand a feeling label, eye contact, an apology or independent calming.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C031 · A two-turn object conversation

Young toddlers · 12–23 months | Communication & early literacy | Child-led exploration

Purpose

Extend a child’s message through responsive language.

Prepare and invite

Familiar object from play
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Notice the child’s point, sound, word or action.
2. Answer with one short meaningful phrase.
3. Pause and respond to the next message without testing vocabulary.

Observe and respond

Communication form, meaning and adult wait time.

Possible next opportunity

Add one useful home-language word to repeated play.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C032 · Retell a familiar page

Young toddlers · 12–23 months | Communication & early literacy | Child-led exploration

Purpose

Connect a repeated story with the child’s own communication.

Prepare and invite

Favorite sturdy book; optional real object
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Read or tell a short familiar part.
2. Pause at a meaningful moment for any response.
3. Accept pointing, action, sound or words and continue with the child’s interest.

Observe and respond

Participation and understanding beyond repeating words.

Possible next opportunity

Use a safe real object from the story during play.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C033 · Push, stop and park

Young toddlers · 12–23 months | Movement & self-care | Child-led exploration

Purpose

Coordinate whole-body movement and stopping.

Prepare and invite

Stable child-safe push object; clear level path
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Check the path and offer the stable object.
2. Follow the child’s pace and model stopping at a clear place.
3. Allow another attempt or a different movement choice.

Observe and respond

Balance, pace, stopping and support needed.

Possible next opportunity

Add an easy destination without creating a race.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Use equipment appropriate to current mobility; no stairs, heavy loads, unstable carts or infant walkers.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C034 · Help wipe a small safe spill

Young toddlers · 12–23 months | Movement & self-care | Child-led exploration

Purpose

Participate in a useful care routine with adult support.

Prepare and invite

Small clean cloth; a little water on a tray
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Acknowledge the spill without blame.
2. Show one wiping movement and offer the cloth.
3. Help finish and return materials together.

Observe and respond

Willing participation, movement and amount of help.

Possible next opportunity

Invite the child to return the cloth to its place.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adults handle chemicals, bodily fluids, broken glass and hazardous spills; promptly dry floors.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C035 · Fill, empty and compare

Young toddlers · 12–23 months | Thinking & mathematics | Child-led exploration

Purpose

Explore capacity and the effects of adding and removing.

Prepare and invite

Two large open containers; large safe blocks
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer a few blocks and both containers.
2. Describe the child’s filling or emptying action.
3. Invite a comparison only if interest continues.

Observe and respond

Actions chosen and noticing full, empty or room for more.

Possible next opportunity

Try the same blocks in a differently shaped container.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No small objects, plastic bags, tight lids or entrapment risks.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C036 · Build and change a short tower

Young toddlers · 12–23 months | Thinking & mathematics | Child-led exploration

Purpose

Explore balance, arrangement and a change in structure.

Prepare and invite

Large light stable blocks; clear floor
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Follow the child’s choice of blocks.
2. Model one stable placement if useful.
3. Allow rebuilding, knocking down safely or a different arrangement.

Observe and respond

Strategies, persistence and changes after a collapse.

Possible next opportunity

Offer a wider base and observe the child’s choice.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Use light blocks, low structures and a clear area; prevent throwing at people.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C037 · Look closely on a short nature visit

Young toddlers · 12–23 months | Science & inquiry | Child-led exploration

Purpose

Notice a real living thing or natural feature.

Prepare and invite

Safe accessible outdoor space; caregiver
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Follow interest toward a safe plant, leaf or shadow.
2. Describe one feature and wait for a response.
3. Revisit the same place rather than collecting unknown objects.

Observe and respond

What the child notices and how they communicate it.

Possible next opportunity

Return to the same feature on another day.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Follow outdoor, weather and sun-safety procedures. No unknown plant tasting, animal handling or small collected objects.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C038 · A ramp for a large rolling object

Young toddlers · 12–23 months | Science & inquiry | Child-led exploration

Purpose

Explore how a surface changes movement.

Prepare and invite

Low stable ramp; large safe ball; clear landing space
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Show the ball at the top of a low safe ramp.
2. Allow releasing, watching or retrieving with support.
3. Repeat and describe what actually happens.

Observe and respond

Anticipation, release and response to the result.

Possible next opportunity

Change the starting point slightly with adult support.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No small balls, steep/heavy ramps or roll paths into other children.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C039 · Big marks, real choices

Young toddlers · 12–23 months | Creative expression | Child-led exploration

Purpose

Explore mark making through self-chosen movement.

Prepare and invite

Large paper fixed in place; non-toxic large drawing tools
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Show that one tool leaves a mark.
2. Offer a comfortable choice of movement and position.
3. Describe the action without asking for a recognizable picture.

Observe and respond

Movement, tool access, choices and interest.

Possible next opportunity

Offer a different safe surface or tool.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Direct supervision; choose materials for mouthing risk and avoid small caps or broken tools.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C040 · Quiet and lively sounds

Young toddlers · 12–23 months | Creative expression | Child-led exploration

Purpose

Choose and compare comfortable sound actions.

Prepare and invite

Safe large percussion object or adult clapping
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer one gentle sound and pause.
2. Invite the child’s own action or quiet observation.
3. Respond to the child’s pattern without increasing volume automatically.

Observe and respond

Sound choices, cause-effect and sensory comfort.

Possible next opportunity

Use the child’s pattern in a familiar song.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Check integrity and volume; no small detachable instrument parts or objects placed near ears.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C041 · My place for familiar belongings

Young toddlers · 12–23 months | Community & belonging | Child-led exploration

Purpose

Participate in a predictable shared-space routine.

Prepare and invite

Accessible labeled cubby; photo or symbol chosen with family
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Show the child’s own accessible place.
2. Invite one useful action, such as putting away a coat with help.
3. Acknowledge the action and move into a chosen activity.

Observe and respond

Recognition, access and support actually needed.

Possible next opportunity

Use the same photo or symbol at another familiar transition.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Labels must not expose sensitive information; store bags and straps safely out of play reach.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C042 · Family routines in pretend play

Young toddlers · 12–23 months | Community & belonging | Child-led exploration

Purpose

Represent a familiar caring action without a required family script.

Prepare and invite

Large safe dolls or familiar household play objects
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer diverse safe materials and notice the child’s idea.
2. Name or join one caring action if invited.
3. Ask the family what real routines or words might make the play meaningful.

Observe and respond

Actions represented and the child’s own meaning.

Possible next opportunity

Add one family-suggested safe prop.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No stereotyped caregiver roles; check doll parts, straps, choking hazards and cultural comfort.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C043 · Two children, enough materials

Older toddlers · 24–35 months | Relationships & regulation | Child-led exploration

Purpose

Practice being near a peer with responsive adult support.

Prepare and invite

Two accessible sets of a familiar activity
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Prepare enough usable materials to reduce avoidable conflict.
2. Describe each child’s activity and model a simple request if needed.
3. Support boundaries and a workable solution without forcing sharing.

Observe and respond

Peer interest, communication and adult support.

Possible next opportunity

Offer an optional brief joint action when both children want it.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C044 · A supported transition choice

Older toddlers · 24–35 months | Relationships & regulation | Child-led exploration

Purpose

Participate in a transition with understandable support.

Prepare and invite

Predictable routine; simple visual cue; two safe options
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Give a short clear cue connected to the real next step.
2. Offer two acceptable actions or a familiar helper role.
3. Allow processing time and co-regulate as needed.

Observe and respond

What helped the child shift activities and what remained difficult.

Possible next opportunity

Repeat the helpful cue rather than adding many reminders.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not use food withholding, public behavior charts or forced compliance as the learning activity.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C045 · Tell me about your play

Older toddlers · 24–35 months | Communication & early literacy | Child-led exploration

Purpose

Expand a meaningful message without taking over the play.

Prepare and invite

Child’s chosen play materials
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Observe and comment on what the child is doing.
2. Wait for a response and expand one idea naturally.
3. Offer a question only when it supports the child’s own purpose.

Observe and respond

Meaning, communication form and conversational turns.

Possible next opportunity

Revisit a useful word during the same kind of play.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C046 · Act out a short familiar story

Older toddlers · 24–35 months | Communication & early literacy | Child-led exploration

Purpose

Represent story events through action and communication.

Prepare and invite

Simple safe props; familiar short book or oral story
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Share a short familiar event sequence.
2. Invite a chosen role or a prop action without assigning parts.
3. Let the child change the story and discuss what happened.

Observe and respond

Sequence, symbolic play and the child’s ideas.

Possible next opportunity

Add a new ending suggested by the child.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No forced performance or costume ties; use accessible roles and culturally respectful stories.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C047 · A safe movement pathway

Older toddlers · 24–35 months | Movement & self-care | Child-led exploration

Purpose

Plan a comfortable route using current movement abilities.

Prepare and invite

Clear floor; low stable stepping or going-around markers
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Check a simple accessible route.
2. Model one safe action and invite the child’s own route.
3. Adjust the challenge based on balance, access and interest.

Observe and respond

Movement planning and the help needed at one point.

Possible next opportunity

Invite the child to choose where a marker goes.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No risky heights, speed races or unstable climbing; offer a seated or mobility-device route.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C048 · Handwashing as shared learning

Older toddlers · 24–35 months | Movement & self-care | Child-led exploration

Purpose

Take an active part in a real hygiene sequence.

Prepare and invite

Safe sink access; soap; approved drying method
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Explain why hands need care in the current situation.
2. Model and support the program’s full handwashing routine.
3. Invite the child to notice the next useful step.

Observe and respond

Sequence participation and the assistance actually provided.

Possible next opportunity

Use the same support at another required handwashing time.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Follow actual health procedures; a learning activity never replaces required adult supervision or hygiene.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C049 · Count a small useful collection

Older toddlers · 24–35 months | Thinking & mathematics | Child-led exploration

Purpose

Connect one count word with one object in a real task.

Prepare and invite

A few large safe objects, such as cups for a small group
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite a small useful collection, starting with a manageable amount.
2. Touch or move one object for each count word together.
3. Use the collection and check whether each person has one.

Observe and respond

One-to-one actions and whether quantity language has meaning.

Possible next opportunity

Try the same quantity with different safe objects.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Count objects rather than requiring food manipulation; check material safety and keep the amount individually appropriate.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C050 · Match and sort familiar objects

Older toddlers · 24–35 months | Thinking & mathematics | Child-led exploration

Purpose

Notice a shared feature and use a simple sorting rule.

Prepare and invite

Large familiar objects; two visible sorting spaces
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Explore a few contrasting safe objects.
2. Model one meaningful match or category.
3. Let the child sort, explain or change the rule with support.

Observe and respond

What feature guides the sort and whether the rule changes.

Possible next opportunity

Compare two plausible sorting rules without marking one as the only answer.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C051 · Sink or float: notice the result

Older toddlers · 24–35 months | Science & inquiry | Child-led exploration

Purpose

Make and observe a simple prediction with adult support.

Prepare and invite

Shallow water container; large safe test objects; towel
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer one safe object and ask what might happen if the child is interested.
2. Place it in shallow water and observe together.
3. Describe the actual result and choose whether to test another.

Observe and respond

Prediction, observation and communication about the result.

Possible next opportunity

Repeat the same object to check the result.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Direct within-reach water supervision; no small objects, deep water or unattended containers. Empty and dry afterward.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C052 · Change a rolling path

Older toddlers · 24–35 months | Science & inquiry | Child-led exploration

Purpose

Explore how one change affects movement.

Prepare and invite

Large ball; low stable ramp; safe blocker
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Roll along a familiar clear path.
2. Add one safe change, such as a low barrier.
3. Observe where the ball goes and invite another idea.

Observe and respond

What changed and whether the child noticed its effect.

Possible next opportunity

Let the child choose between two safe path changes.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C053 · Paint with a chosen tool

Older toddlers · 24–35 months | Creative expression | Child-led exploration

Purpose

Choose a tool and explore its visual effect.

Prepare and invite

Non-toxic washable paint; large paper; two safe tools
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Show safe use and cleanup of the selected tools.
2. Allow the child to choose marks and placement.
3. Describe a noticed action or effect without supplying a model to copy.

Observe and respond

Tool choices, movement and original decisions.

Possible next opportunity

Offer a different tool alongside a familiar one.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Check allergies and mouthing risk; no small loose tools, food-based sensory mixtures or forced messy play.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C054 · Echo and invent a movement

Older toddlers · 24–35 months | Creative expression | Child-led exploration

Purpose

Represent an idea through a self-chosen movement.

Prepare and invite

Clear space; optional familiar music
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer one accessible movement and pause.
2. Invite a child to offer a movement for a willing partner.
3. Follow the child’s pattern or an adapted seated version.

Observe and respond

Imitation, initiation, choice and sensory comfort.

Possible next opportunity

Combine two child-chosen movements.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Participation is optional; keep space clear and sound comfortable.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C055 · Homes can look different

Older toddlers · 24–35 months | Community & belonging | Child-led exploration

Purpose

Recognize varied homes and family experiences without ranking them.

Prepare and invite

Inclusive books or family-approved drawings
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Share a few accurate varied examples.
2. Invite the child to notice something familiar or interesting without requiring personal disclosure.
3. Represent a chosen home idea with large safe blocks or drawing.

Observe and respond

Respectful language and the child’s chosen meaning.

Possible next opportunity

Ask families which books or words would reflect their experience.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Avoid assumptions about housing, family structure, income or ownership.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C056 · Help care for our room

Older toddlers · 24–35 months | Community & belonging | Child-led exploration

Purpose

Participate in caring for a shared place.

Prepare and invite

Accessible shelf; safe cloth; a real manageable task
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Notice a small real need with the child.
2. Offer one safe useful action and any needed help.
3. Check the result together and thank the contribution without making care a punishment.

Observe and respond

Purpose, participation and restoration.

Possible next opportunity

Invite a child-chosen care task at another time.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adults handle heavy items, cleaners and hazardous messes.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C057 · Ask to join and hear the answer

Preschool · 3 years · 36–47 months | Relationships & regulation | Child-led exploration

Purpose

Use a respectful entry strategy while honoring another person’s response.

Prepare and invite

Ongoing play; willing adult role-play partner if needed
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Observe the play before interrupting.
2. Model a short request or useful contribution.
3. Support the response and help find another option if entry is not possible.

Observe and respond

Entry strategy, consent and adult support.

Possible next opportunity

Revisit the strategy in a different play area.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C058 · Solve a small shared problem

Preschool · 3 years · 36–47 months | Relationships & regulation | Child-led exploration

Purpose

Practice explaining a need and trying a workable solution.

Prepare and invite

A real manageable disagreement; optional visual choices
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Ensure safety and describe the problem without blame.
2. Help each child communicate a perspective in an accessible way.
3. Offer or invite a fair next step and check whether it worked.

Observe and respond

Perspectives expressed, support used and the real outcome.

Possible next opportunity

Practice a useful request before another disagreement.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adults intervene immediately for aggression, bullying or unsafe behavior; children do not have to mediate harm.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C059 · A question-rich read-aloud

Preschool · 3 years · 36–47 months | Communication & early literacy | Guided play / inquiry

Purpose

Build understanding and vocabulary through a shared story.

Prepare and invite

Rich inclusive picture book selected for the group
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite children to notice a meaningful detail before or during reading.
2. Pause for a few genuine comments or questions, not constant testing.
3. Connect an idea with play or experience afterward.

Observe and respond

Comprehension, language in all forms and the child’s own questions.

Possible next opportunity

Revisit one interesting word in real play.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C060 · Names, sounds and useful signs

Preschool · 3 years · 36–47 months | Communication & early literacy | Guided play / inquiry

Purpose

Explore how spoken language and print carry useful meaning.

Prepare and invite

Child-chosen name cards or real classroom signs
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Use a real reason to notice a name or sign.
2. Discuss a relevant letter, sound or symbol only at the child’s access level.
3. Invite a meaningful mark, match or message rather than copying rows.

Observe and respond

Print purpose, sound noticing and the support needed.

Possible next opportunity

Make a sign for a chosen play structure.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Respect home-language writing systems and name pronunciation; do not require English-only responses.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C061 · Cut, arrange and join

Preschool · 3 years · 36–47 months | Movement & self-care | Child-led exploration

Purpose

Coordinate hands to create an original construction.

Prepare and invite

Child-safe scissors; suitable paper; glue; adapted tools if needed
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Demonstrate safe carrying and one cutting action.
2. Invite a design using chosen pieces.
3. Support joining and cleanup without taking over the product.

Observe and respond

Two-hand coordination, tool access and choices.

Possible next opportunity

Offer a new paper shape or an adaptive tool.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Direct supervision of scissors and small pieces; check glue ingredients and individual access needs.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C062 · Move around a planned space

Preschool · 3 years · 36–47 months | Movement & self-care | Child-led exploration

Purpose

Coordinate movement while noticing other people and space.

Prepare and invite

Clear indoor/outdoor space; safe markers
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Plan clear boundaries and an accessible route.
2. Invite traveling around or between markers at a comfortable pace.
3. Pause to notice what makes the route easier or safer.

Observe and respond

Body awareness, route planning and consideration of others.

Possible next opportunity

Let children redesign part of the safe route.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No elimination games or speed pressure; adapt for mobility and medical plans.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C063 · How many do we need?

Preschool · 3 years · 36–47 months | Thinking & mathematics | Guided play / inquiry

Purpose

Use a small quantity to solve a real distribution problem.

Prepare and invite

Large safe counters or real classroom supplies
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Identify a meaningful need, such as cups for the children at one table.
2. Count or match supplies with the people using an accessible strategy.
3. Check the result and adjust together.

Observe and respond

One-to-one correspondence, counting strategy and quantity meaning.

Possible next opportunity

Try a slightly changed group size if the child is interested.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C064 · Build and describe a shape

Preschool · 3 years · 36–47 months | Thinking & mathematics | Guided play / inquiry

Purpose

Explore shape properties through construction and explanation.

Prepare and invite

Large blocks or safe shape pieces
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer pieces for a child-chosen design.
2. Notice edges, corners, curves or how pieces fit.
3. Invite a change and discuss what still makes the shape recognizable.

Observe and respond

Spatial reasoning and descriptions rather than shape-name recall alone.

Possible next opportunity

Show the same shape in another orientation.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Choose pieces safe for the group; no sharp edges or small parts for children who mouth materials.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C065 · What makes a shadow change?

Preschool · 3 years · 36–47 months | Science & inquiry | Guided play / inquiry

Purpose

Notice how position changes a shadow.

Prepare and invite

Indirect sunlight or safe low-intensity light; wall; large object
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Find an existing shadow in a safe place.
2. Move one object or change its position with adult support.
3. Compare the shadows and describe actual differences.

Observe and respond

Questions, position changes and observable comparisons.

Possible next opportunity

Draw or trace a shadow and revisit it later.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No looking at the sun, bright lights into eyes, laser pointers or hot lamps.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C066 · A plant-care question

Preschool · 3 years · 36–47 months | Science & inquiry | Guided play / inquiry

Purpose

Connect observation with a real care decision.

Prepare and invite

Safe non-toxic classroom plant; care tools; drawing paper
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Look at the actual plant and its growing conditions.
2. Ask what care may be needed and consult reliable guidance with adult help.
3. Provide appropriate care and record a visible change.

Observe and respond

Observation separate from guesses and the care actually given.

Possible next opportunity

Revisit the same plant after enough time for a meaningful comparison.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects non-toxic plants, checks allergies and handles soil/plant health concerns; wash hands.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C067 · Make art from an idea

Preschool · 3 years · 36–47 months | Creative expression | Child-led exploration

Purpose

Communicate an idea through original choices.

Prepare and invite

Two or three safe art media; open-ended workspace
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite an idea or let an interest emerge.
2. Demonstrate only safe material use, not a required finished product.
3. Ask whether the child wants to share a meaning and document their own words.

Observe and respond

Choices, process and the child’s explanation.

Possible next opportunity

Revisit the idea using another medium.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C068 · Sound patterns for a story

Preschool · 3 years · 36–47 months | Creative expression | Child-led exploration

Purpose

Use sound intentionally to represent an event or feeling.

Prepare and invite

Quiet safe instruments or voice; familiar story
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose a familiar story event.
2. Invite children to propose a sound or a quiet alternative.
3. Try the sound in context and discuss what it communicates.

Observe and respond

Intentional sound choices, turn taking and meaning.

Possible next opportunity

Create a short child-led sound sequence.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Keep volume comfortable and offer visual/movement roles; do not require public performance.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C069 · Our classroom agreements in action

Preschool · 3 years · 36–47 months | Community & belonging | Child-led exploration

Purpose

Connect a shared agreement with safety, care and belonging.

Prepare and invite

A real classroom situation; pictures if useful
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Notice a real need, such as keeping a walkway clear.
2. Invite children’s ideas and make one concrete shared plan.
3. Try it, observe the result and revise rather than rewarding compliance.

Observe and respond

Reasoning about care and the actual usefulness of the agreement.

Possible next opportunity

Revisit an agreement when it stops working.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adults retain safeguarding responsibility; children do not decide whether safety rules apply.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C070 · Learn from a family contribution

Preschool · 3 years · 36–47 months | Community & belonging | Child-led exploration

Purpose

Explore one family’s experience respectfully.

Prepare and invite

Optional family story, language, object or picture
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite a voluntary specific contribution without asking a family to represent a whole culture.
2. Explore its meaning using the family’s own words.
3. Record children’s questions and similarities without ranking traditions.

Observe and respond

Respectful questions and recognition of variation within cultures.

Possible next opportunity

Invite another perspective with permission.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Protect privacy; do not require cultural disclosure or use sacred objects as costume props.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C071 · Plan roles for shared pretend play

Pre-K · 4 years · 48–59 months | Relationships & regulation | Child-led exploration

Purpose

Negotiate a shared idea while keeping participation flexible.

Prepare and invite

Open-ended role-play materials; simple planning surface
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite children to explain a play idea and the roles it needs.
2. Support accessible requests and alternatives when roles overlap.
3. Return to see whether the plan is still working and allow changes.

Observe and respond

Negotiation, flexibility, inclusion and adult support.

Possible next opportunity

Represent a changed plan with drawings or symbols.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not assign roles by gender, language or perceived ability.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C072 · Try a helpful regulation strategy together

Pre-K · 4 years · 48–59 months | Relationships & regulation | Child-led exploration

Purpose

Find a comfortable support with an adult during a manageable moment.

Prepare and invite

Familiar calm space; optional visual or sensory support
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Discuss or notice a mild real need for help.
2. Offer an individually appropriate strategy without requiring it.
3. Observe whether it helped and identify another support if needed.

Observe and respond

The situation, strategy chosen and actual response.

Possible next opportunity

Practice a helpful support during a calm routine.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No isolation, restraint, forced breathing or sensory contact. Comfort and help remain available; follow individual support plans.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C073 · Hear and play with word sounds

Pre-K · 4 years · 48–59 months | Communication & early literacy | Guided play / inquiry

Purpose

Notice and manipulate spoken sounds through playful accessible interaction.

Prepare and invite

Familiar words; pictures or real objects
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Start with a familiar spoken word or rhyme.
2. Model one appropriate sound comparison, such as a beginning sound.
3. Invite a playful response and check understanding without a speed task.

Observe and respond

The sound feature noticed, separate from letter naming.

Possible next opportunity

Connect a secure sound with a useful known letter when appropriate.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adapt to the language being taught and hearing/communication access; sound patterns do not transfer identically across languages.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C074 · Make a meaningful message

Pre-K · 4 years · 48–59 months | Communication & early literacy | Guided play / inquiry

Purpose

Use drawing, emerging spelling, signs or dictation to communicate a purpose.

Prepare and invite

Paper; drawing tools; optional alphabet, stamps or adult scribe
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose a real audience and message, such as a request for the block area.
2. Help the child select a comfortable way to record it.
3. Read or communicate it back and check whether it says what the child intended.

Observe and respond

Authorship, sound-symbol use where relevant and meaning.

Possible next opportunity

Invite a reply or revise the message after real use.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C075 · Prepare a safe shared snack task

Pre-K · 4 years · 48–59 months | Movement & self-care | Child-led exploration

Purpose

Coordinate a useful preparation sequence with hygiene and access support.

Prepare and invite

Approved food; appropriate safe tools; handwashing access
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Review allergies, the safe task and the actual program procedure.
2. Model one preparation action and invite a supported turn.
3. Serve appropriately and restore the workspace together.

Observe and respond

Hygiene participation, tool control and help needed.

Possible next opportunity

Plan another approved preparation step based on observed access.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Direct adult supervision; follow food safety, allergy, choking and individual care rules. No cooking heat, unsafe knives or tasting to test allergies.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C076 · Design an accessible movement game

Pre-K · 4 years · 48–59 months | Movement & self-care | Child-led exploration

Purpose

Plan, explain and adapt a movement game so others can join.

Prepare and invite

Clear safe space; large markers; optional visual cues
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite a simple game idea and check safety.
2. Try it with willing participants using accessible movement choices.
3. Ask who could participate and change one barrier.

Observe and respond

Planning, safe control, access and willingness to adapt.

Possible next opportunity

Let another child propose an inclusive rule.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No elimination, public ranking, forced exertion or movement against individual plans.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C077 · Count, compare and explain

Pre-K · 4 years · 48–59 months | Thinking & mathematics | Guided play / inquiry

Purpose

Use a counting or matching strategy to compare quantities.

Prepare and invite

Manageable collections of large safe objects
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Offer two meaningful collections at a level the child can access.
2. Invite a strategy for comparing and describe the result.
3. Rearrange one collection and check whether the amount changed.

Observe and respond

Counting accuracy, cardinality and reasoning about rearrangement.

Possible next opportunity

Use a slightly different collection or quantity when understanding is observable.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C078 · Continue and change a pattern

Pre-K · 4 years · 48–59 months | Thinking & mathematics | Guided play / inquiry

Purpose

Recognize a repeated unit and use it to predict or create.

Prepare and invite

Large safe objects, movements or sounds
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Explore a short meaningful repeating pattern.
2. Ask what repeats and what might come next, accepting a nonverbal response.
3. Invite a new pattern or change and explain the rule.

Observe and respond

Identification of the repeat rather than copying a sequence only.

Possible next opportunity

Represent the same pattern with another material.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult selects intact, age-appropriate materials, checks access and supervises throughout. Stop or adapt when the child shows fatigue, distress or disengagement.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C079 · Test one change in a ramp

Pre-K · 4 years · 48–59 months | Science & inquiry | Guided play / inquiry

Purpose

Compare the result of one changed condition.

Prepare and invite

Low stable ramp; large safe rolling object; two safe surface options
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose one question, such as what happens on a smoother surface.
2. Keep other parts as steady as practical and test the two conditions.
3. Record the actual results and discuss uncertainty.

Observe and respond

Prediction, changed condition, result and willingness to revise.

Possible next opportunity

Repeat a surprising result before explaining it as certain.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Use safe low setups and large objects; no roll paths into people or unsafe heights.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C080 · Observe an animal without disturbing it

Pre-K · 4 years · 48–59 months | Science & inquiry | Guided play / inquiry

Purpose

Use evidence to describe an animal’s features or behavior.

Prepare and invite

Safe outdoor observation or accurate video-free picture/reference alternative
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Notice an accessible animal from a respectful safe distance or use a reliable image.
2. Record an actual visible feature or action.
3. Consult a reliable source with adult help about a question that remains.

Observe and respond

Observation versus assumption and care for living things.

Possible next opportunity

Revisit the question at another observation opportunity.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No touching wildlife, nests, stinging insects or unknown animal remains. Follow allergy, outdoor and hygiene procedures.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C081 · Create and revise a construction

Pre-K · 4 years · 48–59 months | Creative expression | Child-led exploration

Purpose

Use a design idea, notice a result and revise intentionally.

Prepare and invite

Large safe blocks; drawing materials; optional connectors
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite a structure with a purpose chosen by the child.
2. Build, test its practical use and notice what happens.
3. Change a feature and represent the revision through drawing or explanation.

Observe and respond

Purpose, choices, response to a problem and revision.

Possible next opportunity

Document an early and later version without ranking children.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Use stable low construction and safe materials; no heavy overhead structures.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C082 · A child-authored performance choice

Pre-K · 4 years · 48–59 months | Creative expression | Child-led exploration

Purpose

Express a shared idea through chosen creative roles.

Prepare and invite

Story idea; safe props; options for narration, movement, art or observing
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite an idea and several ways to participate.
2. Try a short sequence with voluntary roles.
3. Ask what the children want to keep or change.

Observe and respond

Creative decisions, collaboration and participation access.

Possible next opportunity

Develop one child-chosen part across another day.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No forced stage performance, memorization pressure, role stereotypes or costume entanglement hazards.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C083 · Map a familiar place

Pre-K · 4 years · 48–59 months | Community & belonging | Child-led exploration

Purpose

Use a representation to communicate location and access.

Prepare and invite

Large paper; accessible drawing tools; known classroom or outdoor area
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Explore a familiar safe place and identify a useful feature.
2. Draw, build or describe a simple map together.
3. Use it for a real purpose and revise what is unclear.

Observe and respond

Symbolic representation, spatial words and whether another person can use it.

Possible next opportunity

Add an accessible route or a missing landmark.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not publish a map that exposes security details or private child locations.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C084 · A real classroom helping project

Pre-K · 4 years · 48–59 months | Community & belonging | Child-led exploration

Purpose

Plan and evaluate a contribution to a shared community.

Prepare and invite

A manageable shared need; safe project materials
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Notice a need with the children and hear different perspectives.
2. Choose a safe useful action without making any child a rescuer or charity display.
3. Do the action and ask whether it helped the intended people.

Observe and respond

Purpose, participation, respect and evidence of usefulness.

Possible next opportunity

Invite feedback and revise the plan.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No public disclosure of another family’s circumstances or required donations; adult permission and safeguarding apply.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C085 · Collaborative planning with revision

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Relationships & regulation | Child-led exploration

Purpose

Coordinate ideas, roles and changing needs in a group project.

Prepare and invite

Shared play/project materials; optional plan sheet
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite each child to communicate an idea and a workable role.
2. Try a short agreed plan with adult support available.
3. Review whose ideas were heard and revise the plan.

Observe and respond

Perspective taking, flexibility, participation and support.

Possible next opportunity

Use the revised plan in another session.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adults handle exclusion or harmful dynamics promptly; children need not negotiate unsafe treatment.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C086 · Reflect on a helpful next step

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Relationships & regulation | Child-led exploration

Purpose

Discuss a challenge using evidence and a useful support.

Prepare and invite

A recent manageable event; optional drawing
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Describe an event neutrally and invite the child’s account.
2. Identify a strategy or support that helped or did not help.
3. Choose a next opportunity together without a public behavior score.

Observe and respond

The child’s perspective, evidence and the agreed support.

Possible next opportunity

Revisit the support in a similar situation.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not force disclosure, apologies or emotional performance. Persistent concerns follow the program’s family/referral process, not curriculum diagnosis.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C087 · Decode and understand a short message

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Communication & early literacy | Guided play / inquiry

Purpose

Connect accessible decoding with the meaning of a real message.

Prepare and invite

Checked decodable text using known sound-spelling patterns; adult support
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Confirm that the text’s spelling patterns match taught knowledge.
2. Model or support blending as needed, then read a short meaningful message.
3. Discuss what it means using the words in the text as evidence.

Observe and respond

Decoding, comprehension and support separately.

Possible next opportunity

Reread for meaning and try a small new example when ready.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Coordinate with the child’s school and language needs. Do not use picture guessing, speed or memorized word totals as the sole reading measure.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C088 · Research and write for a purpose

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Communication & early literacy | Guided play / inquiry

Purpose

Use a source and an original message to communicate a finding.

Prepare and invite

Child question; reliable accessible book; paper; optional scribe or assistive communication
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose an answerable question connected to a real interest.
2. Find information with adult help and distinguish it from a guess.
3. Create a drawing, sentence, dictated message or accessible representation for an audience.

Observe and respond

Source use, authorship, meaning and what remains uncertain.

Possible next opportunity

Ask the audience what still needs explaining.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adults select reliable appropriate sources; no unsupervised web searching or disclosure of personal information.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C089 · A multi-step practical project

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Movement & self-care | Child-led exploration

Purpose

Coordinate a short meaningful sequence with accessible tools.

Prepare and invite

Safe craft or care materials; simple visual plan
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose a useful project and inspect tools with the adult.
2. Follow or create a short sequence, pausing for help when needed.
3. Check usefulness and restore the workspace.

Observe and respond

Planning, tool access, coordination and help seeking.

Possible next opportunity

Revise one step to improve access or usefulness.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Adult reviews tools and individual plans; no sharp, hot or chemical processes without the program’s approved supervised setup.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C090 · Practice a school-day routine through play

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Movement & self-care | Child-led exploration

Purpose

Explore an upcoming routine without making independence a condition of belonging.

Prepare and invite

Pretend cubby, belongings and accessible visual cues
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Ask what the child already knows and what support is useful.
2. Role-play a real routine with accessible choices.
3. Identify whom to ask for help and what can be adapted.

Observe and respond

Useful strategies, worries communicated and supports requested.

Possible next opportunity

Coordinate an actual transition support with family and receiving school.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not label a child unready because of toileting, disability, communication or self-care support needs.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C091 · Represent joining and separating

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Thinking & mathematics | Guided play / inquiry

Purpose

Explore an operation as a meaningful change in quantity.

Prepare and invite

Large counters or a real useful collection; drawing tools
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose a small real problem involving joining or taking away.
2. Represent the action with objects and an accessible explanation.
3. Check the result and optionally connect a suitable written symbol.

Observe and respond

Operation meaning, counting strategy and explanation.

Possible next opportunity

Try a related problem with a manageable changed quantity.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Quantity and symbols follow observed understanding and school coordination; no timed fact tests as the curriculum core.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C092 · Measure to solve a design problem

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Thinking & mathematics | Guided play / inquiry

Purpose

Choose and use a consistent comparison strategy.

Prepare and invite

Safe nonstandard units or suitable measuring tool; project material
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Identify a real measurement need, such as a bridge span.
2. Choose a unit and place units consistently with help as needed.
3. Use the result in the design and check whether it works.

Observe and respond

Unit consistency, comparison language and practical checking.

Possible next opportunity

Compare two measurement strategies and discuss any difference.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Use safe blunt tools; avoid trip hazards or measuring another child’s body as a public comparison.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C093 · A small fair-test investigation

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Science & inquiry | Guided play / inquiry

Purpose

Compare conditions, record results and discuss the limits of a small test.

Prepare and invite

Adult-reviewed safe setup; observation sheet
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose one answerable question and identify the planned change.
2. Make a prediction and carry out a safe small comparison.
3. Record what occurred, repeat if useful and distinguish evidence from explanation.

Observe and respond

Question, condition, result, repeat and uncertainty.

Possible next opportunity

Plan one next test based on the actual result.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No hazardous materials, heat, flames, high pressure or unsafe water. A trained adult approves and supervises the setup.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C094 · Compare a model with the real world

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Science & inquiry | Guided play / inquiry

Purpose

Recognize that a representation shows some features and leaves out others.

Prepare and invite

Accurate age-appropriate model, photograph or map; observation opportunity
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Explore a model of an actual familiar place or living thing.
2. Compare a feature with a safe real observation or reliable reference.
3. Discuss what the model can and cannot tell us.

Observe and respond

Comparison, questions and distinction between representation and reality.

Possible next opportunity

Improve one part of the model or seek another source.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Use accurate current references and respectful representations; avoid misleading literal models or unsafe direct observation.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C095 · Develop an original work over time

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Creative expression | Child-led exploration

Purpose

Sustain an idea, make choices and revise with authorship intact.

Prepare and invite

Child-selected safe art or construction media; storage for work in progress
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite the child’s purpose and a choice of accessible media.
2. Keep work available across sessions and document their own explanation.
3. Offer a material or technique when requested and let the child decide about revision.

Observe and respond

Intent, persistence, creative choices and change over time.

Possible next opportunity

Let the child choose how or whether to share the work.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

No required identical product, public ranking or interpreting art as a diagnosis.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C096 · Compose a sound or movement sequence

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Creative expression | Child-led exploration

Purpose

Represent and communicate a pattern or expressive idea.

Prepare and invite

Quiet safe instruments, voice or movement space; optional marks
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Choose an idea and a comfortable way to express it.
2. Build a short sequence and use marks or gestures to remember it.
3. Invite a willing listener or participant and revise if desired.

Observe and respond

Expressive purpose, sequence and the child’s notation.

Possible next opportunity

Try communicating the same idea through a different medium.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Respect hearing, movement and performance preferences; participation can include observing or a quiet visual role.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C097 · Listen to more than one perspective

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Community & belonging | Child-led exploration

Purpose

Use respectful inquiry before making a shared decision.

Prepare and invite

Accessible story, classroom question or real shared decision
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Present a manageable real question and hear different accounts.
2. Separate what each person observed from assumptions.
3. Choose a fair next step and check who still needs support.

Observe and respond

Listening, evidence, fairness and inclusion.

Possible next opportunity

Revisit the decision after trying it.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Do not debate a child’s identity, rights, safety or whether they belong as an optional opinion.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.

C098 · A family-informed transition portfolio

Kindergarten bridge · 5- and 6-year-olds · 60–83 months | Community & belonging | Child-led exploration

Purpose

Communicate strengths, interests and useful supports for a transition.

Prepare and invite

Child-chosen work samples; factual notes; family input; secure storage
Use the pathway as a starting point, not a test. Look for interest and comfortable access; offer a simpler or more complex version as needed.

Possible interaction sequence

1. Invite the child to choose work that means something to them.
2. Add factual observations and the family’s perspective with consent.
3. Share only with authorized people and plan a useful next support.

Observe and respond

Child voice, family input, strengths and the support that helps.

Possible next opportunity

Arrange an authorized handoff conversation with the receiving program.

Access and family connection

Offer home-language words, signs, visual cues, stable positioning and adapted materials as useful. Participation can be watching, touching, moving, pointing or another comfortable response.
Share one factual observation and ask what the family notices or enjoys at home. Suggest an optional everyday version using safe familiar materials; no purchase or homework is expected.

Safety check

Protect privacy; this is not a high-stakes readiness gate, diagnosis or substitute for required records.

Original planning invitation. Adapt to actual cues, access and approved care procedures. Not a milestone deadline, diagnostic task or verified standards assessment.
